Evidence tiers. VERIFIED to primary pages accessed 2026-10-09: rates, shares, county footprints (PID); termination rates (Pennie). DERIVED here: carrier-mix average, compounding, per-county counts, ranks. **Method.** Carrier-mix = sum(statewide prior-year share x approved %) / sum(share) over filers serving at least one area county. Area enrollment is not published, so this is a proxy; the same weights reproduce PID's statewide averages (individual 15.95 vs 15.97; small group 10.28 vs 10.28; 2026 individual 21.50 vs 21.5). Area filer lists match both the September 8 area reports and PID's stated rating areas (PID, 2026f). An average rate change is not what each consumer pays. Descriptive only: no pooling.
